Poisons can make
you sick!

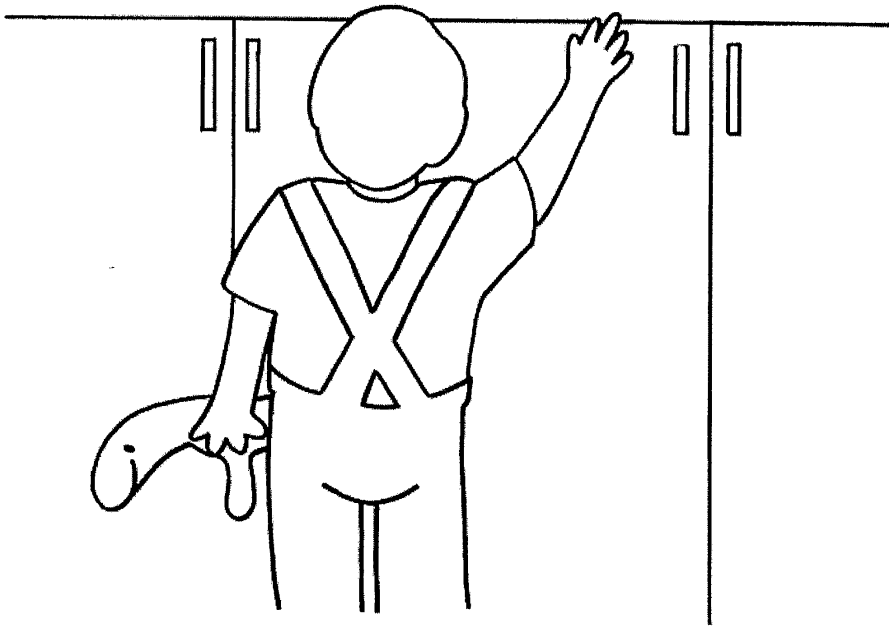

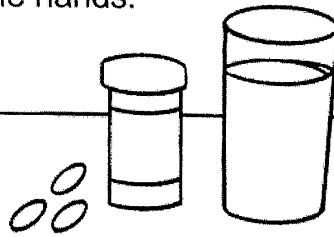

Sometimes instead of going out to play,
you will have to take care of your little
brother or sister.

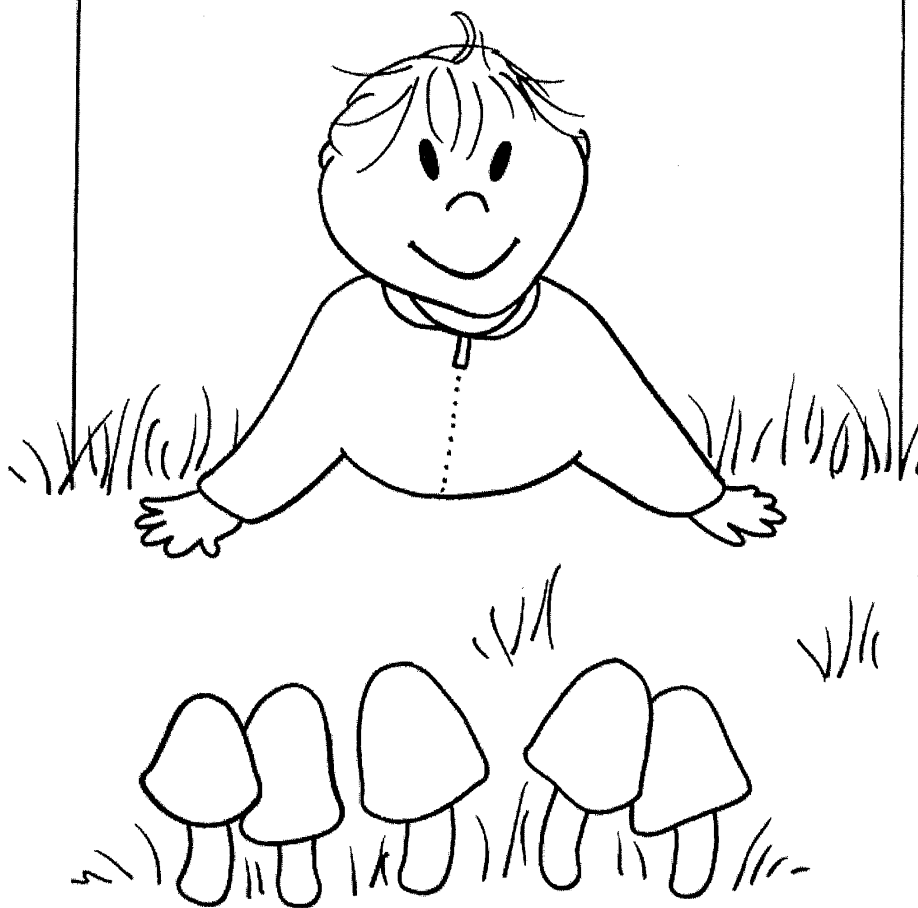

Babies can't read, so dangerous
cleaners must be kept out of reach!

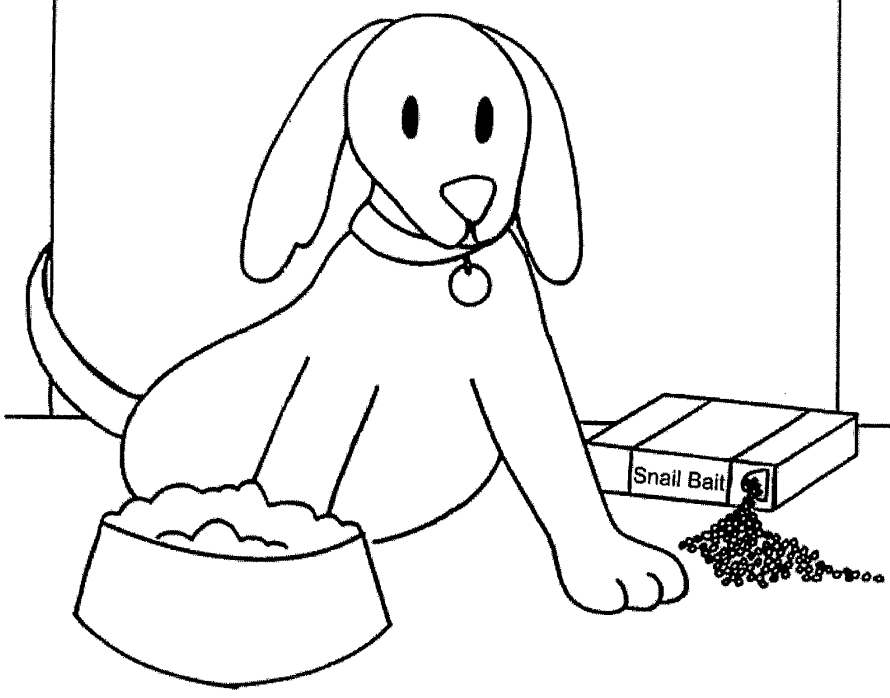

Little children can't tell the difference between medicine and candy. All medicines, even vitamins, should be locked up, safe from little hands.

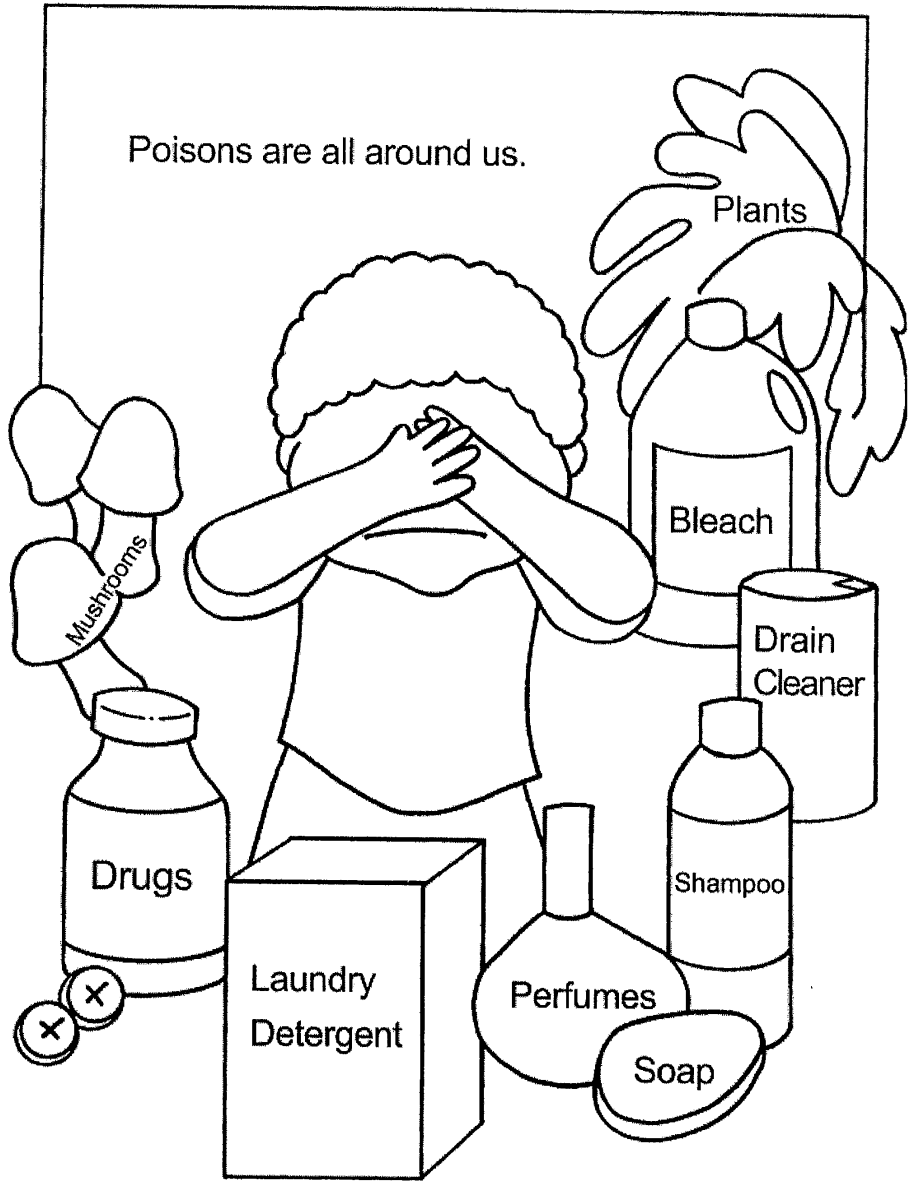

Mushrooms, berries and outdoor plants can be very dangerous. Make sure little children don't eat them.

Pets can be poisoned too! Make sure your pet can't eat something dangerous.

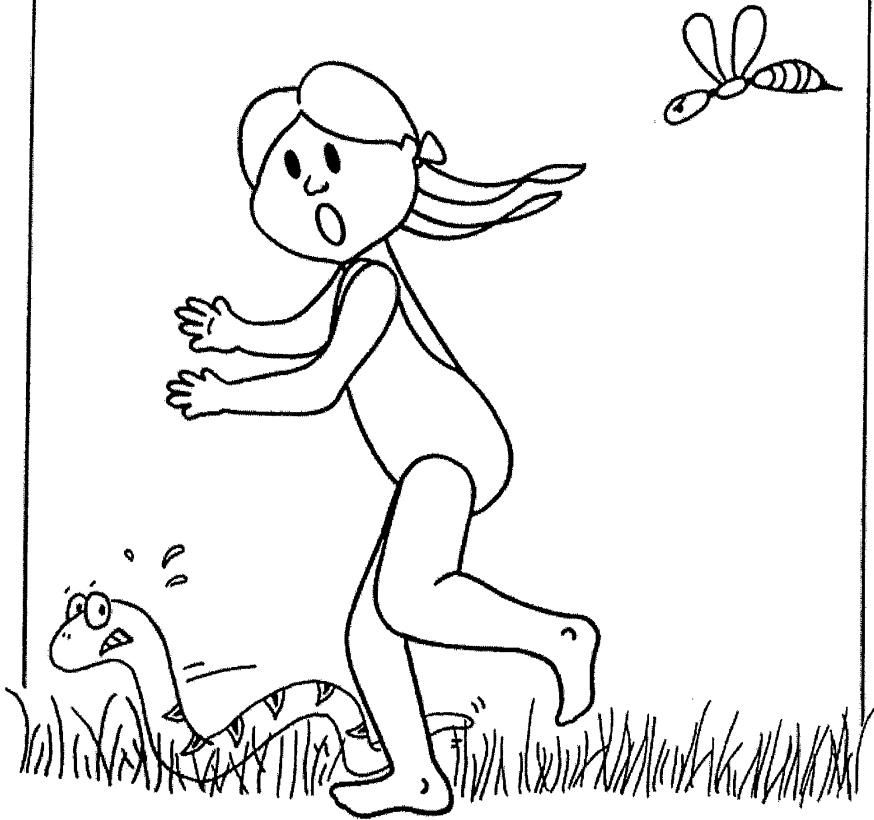

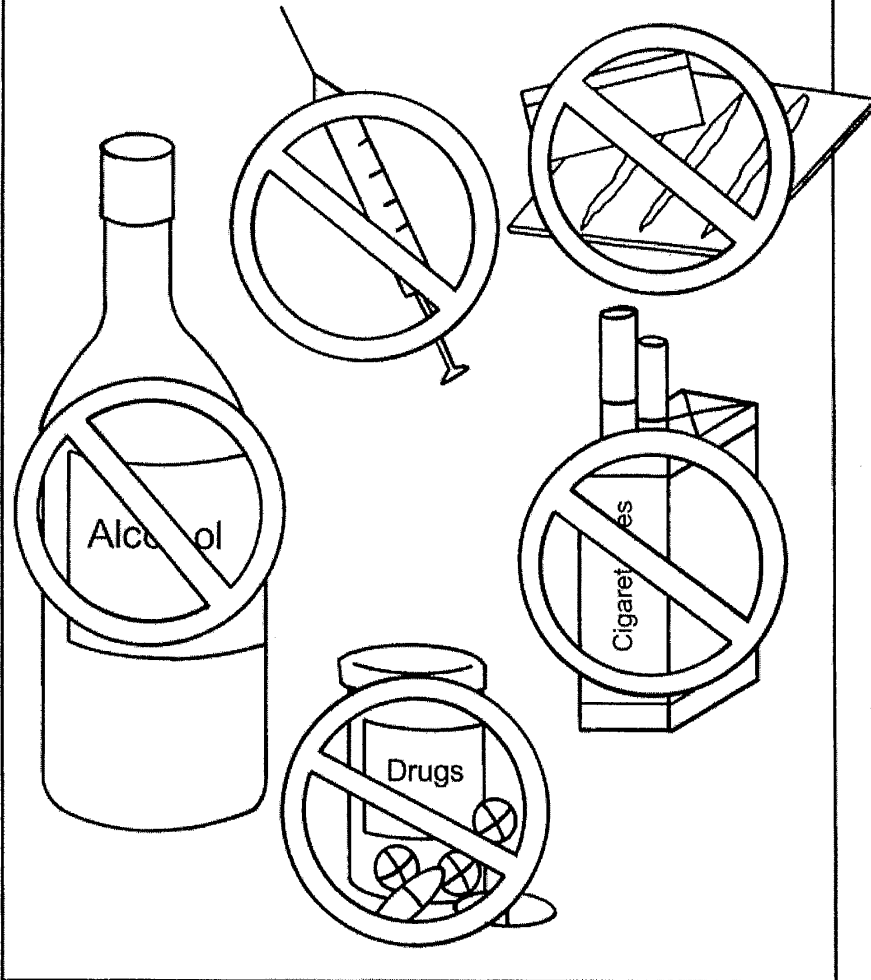

When little children find something pretty
or new, they put it in their mouths.

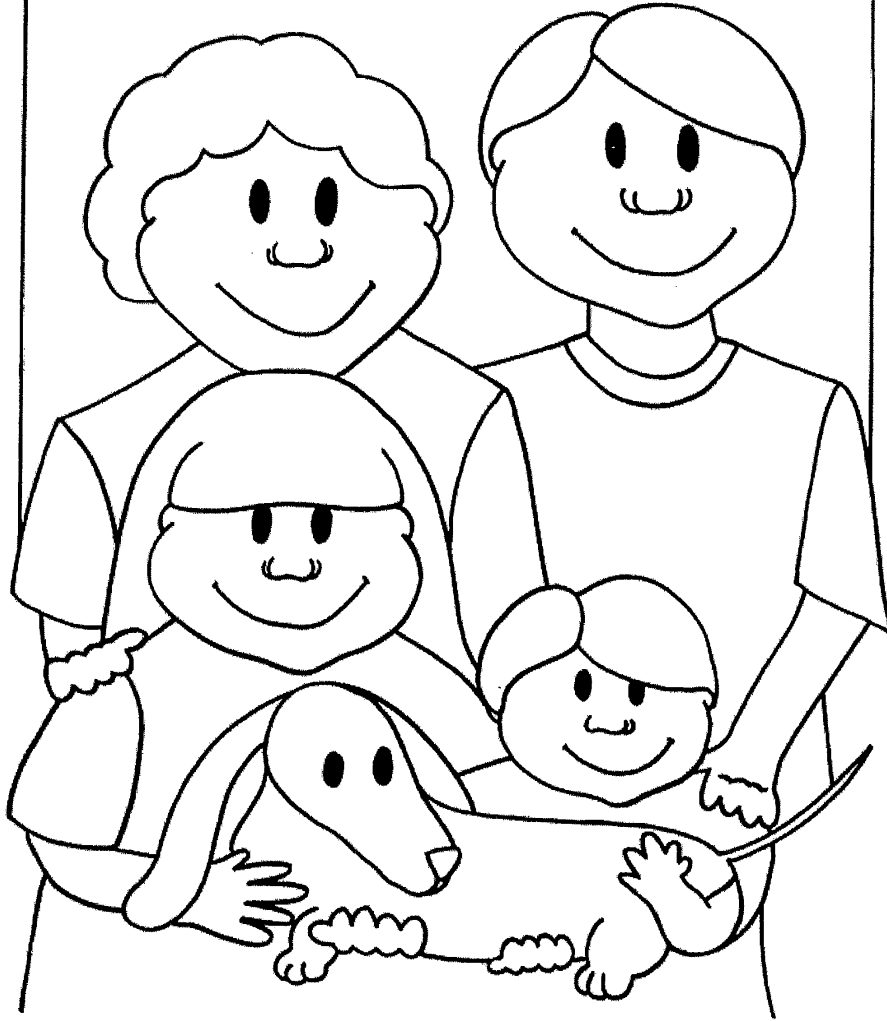

When you are outside, watch out for bites and stings.

Smoking, drinking and taking drugs is **NOT** grown-up. Don't even try them!

We want to keep our homes and yards
safe for our family and pets!

Remember—
DO NOT taste,
DO NOT smell,
DO NOT touch—
unless you ask a
grownup you know.

If you have a poison emergency and there is no help, call
