Forest Service

Northeastern Area State & Private Forestry

Northeastern Forest Experiment Station

NE/NA-INF-122-94

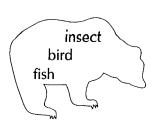

The United States Department of Agriculture (USDA) Forest Service is a diverse organization committed to equal opportunity in employment and program delivery. USDA prohibits discrimination on the basis of race, color, national origin, sex, religion, age, disability, political affiliation and familial status. Persons believing they have been discriminated against should contact the Secretary, U.S. Department of Agriculture, Washington, DC 20250, or call 202-720-7327 (voice), or 202-720-1127 (TTY).

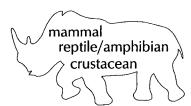

The Web of Life Activity Booklet

This activity booklet was created by Andrea Webster and Rick Henry, both of whom have been interns under the Branching Out To Youth of America Program. Jackie Twiss provided the graphic design throughout the booklet.

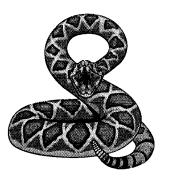

Animals

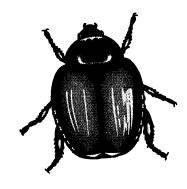

There are many different animal classes. Each class of animals has traits which are specific to their class. See if you can match the animal with the class in which it belongs. Check the glossary if you need help.

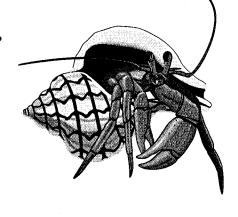

1.

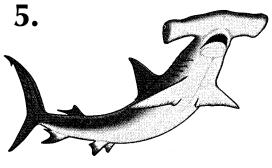

2.

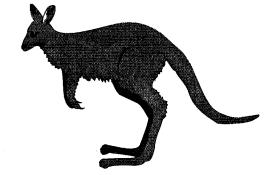

3.

6.

Tree ID

How many different types of trees do you know? Test your knowledge and unscramble the letters to find out how many you know.

1. w d o d o o g ___ _ _ _ _ _ _ _ _ _ _ _ _ _ _

2. leamp

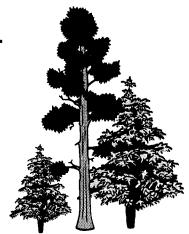

3. k a o

4. rhyrce

5. pscreu

6. nepi

Make the Connection

The items listed in the two columns need to be connected. Draw a line from Column I to the item that matches it in Column II.

1. tree product	A. smoke
2. pollution	B. writer
3. habitat	C. oil
4. natural resource	D. chewing gum
5. someone who works in the Forest Service	E. pond

Answers

5. Oil, gas, water, trees, soil, people, animals and sunlight are natural resources.

4. Writers, artists, scientists, foresters, and accountants can all work for the Forest Service.

3. Desert, pond, ocean, marsh, and prairie are types of habitats.

2. Smoke (air), soil, water and noise are forms of pollutions.

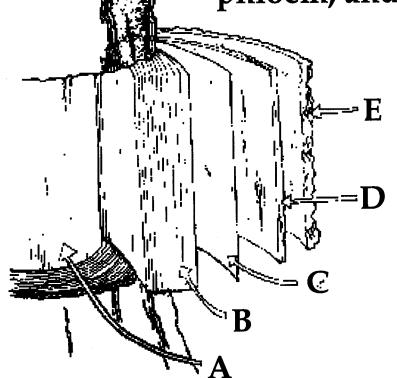

1. Chewing gum is one of many things that come from trees; some other things are: newspaper, some medicine, almonds, and rubber gloves.

In the box below, create a place where one or all of the living things above could live.

Where Did The Water Go?

Do you ever wonder where your drinking, cooking and bathing water comes from? Even more so, where does it go after it leaves your eyesight and heads down the drain? Drinking, bathing and even sewer water begins an endless journey back to the waste water treatment plant where it gets recycled.

Where does the water treatment facility get its water? Rivers and other bodies of water make up the water distributed by the plant to its customers. Once the water leaves your home, it undergoes several procedures which make it clean and safe to use again.

Four-year-old Fran just finished taking a bath. Fran sees the water go down the drain but doesn't know where it goes. Can you help Fran find out where her bathwater goes?

What does Woodsy Owl say? Solve the math problems using addition, subtraction, multiplication and division. After solving the problems, use the decoder box to fill in the letter that corresponds to the answer you

found.

Scavenger Hunt

See if you can find everything on the list! Look at the playground, a parking lot, or your own backyard.

Collect these:

A leaf that has fallen

A rock with two colors

A seed

Three different types of litter (example: paper, plastic, aluminum)

A feather

A pine needle

A small branch that has fallen

Find these, but DO NOT collect:

A flower

A spider
